

## LIST OF TABLES

Table 1.	Current and Projected Water Demands for each Water Use Category by County within the LEC Planning Area. ....	1
Table 2.	Specifications of the High-Resolution Ground Water Models. ....	35
Table 3.	Threatened and Endangered Plant and Animal Species Likely to be Affected by the Lower East Coast Regional Water Supply Plan. ....	54
Table 4.	Minimum Canal Operation Levels of Coastal Canals. ....	87
Table 5.	Acronyms for SFWMM and Subregional Ground Water Model Base Case and Alternatives Simulations. ....	93
Table 6.	Comparison of Assumptions the 1995 and 2020 Base Cases, 2020 with Restudy, and LEC-1 Simulations. ....	95
Table 7.	Components Included in LEC 2020 with Restudy Model Simulations. ....	111
Table 8.	Implementation Schedule for Restudy Components in Five-Year Increments. ....	113
Table 9.	Acronyms for SFWMM Incremental Simulations. ....	115
Table 10.	Comparison of Assumptions for Incremental Model Simulations by the SFWMM. ....	116
Table 11.	Revised Performance Targets for the St Lucie Estuary. ....	120
Table 12.	Information on All Water Restrictions in the SFWMM Simulations for the Base Cases and Alternatives for the Lake Okeechobee Service Area. ....	123
Table 13.	Information on Water Restrictions in the SFWMM Incremental Runs for the Lake Okeechobee Service Area. ....	124
Table 14.	Number of Years with Water Restrictions Caused by Local Triggers in the Base Cases and Alternatives SFWMM Simulations for Lower East Coast Service Areas during the 30 Water Years Simulated. ....	127
Table 15.	Number of Times Water Restriction Triggers in the SFWMM Base Case and Alternatives for the Lower East Coast Service Area Were Triggered. ....	128
Table 16.	Water Supply Results for Ground Water Model Simulations of the LEC 2020 with Restudy and the LEC-1 Alternatives ....	132
Table 17.	The Number of Days each Water Restriction Area is Cutback in the LEC Service Area due to Local Ground Water Conditions. ....	134
Table 18.	Number of Years with Water Restrictions Caused by Local Triggers in the SFWMM Incremental Runs for Lower East Coast Service Areas during the 30 Water Years Simulated. ....	135
Table 19.	Number of times Water Restriction Triggers in the SFWMM Incremental Runs for Lower East Coast Service Areas Were Triggered. ....	136

Table 20.	South Florida Water Management Model Results for Base Cases and Alternatives for Natural Areas within the Lower East Coast Planning Area. ....	140
Table 21.	South Florida Water Management Model Results for Incremental Simulations for Natural Areas within the Lower East Coast Planning Area. ....	142
Table 22.	Summary of Priority Performance Measures for Lake Okeechobee for the 31-Year Simulation. ....	144
Table 23.	Ability to Meet Proposed Minimum Water Level Criteria for Lake Okeechobee for the 31-Year Simulation. ....	145
Table 24.	Incremental Modeling Results for Lake Okeechobee Priority Performance Measures. ....	146
Table 25.	Lake Okeechobee Minimum Flows and Levels Incremental Results for the 31-Year Period of Record. ....	147
Table 26.	Number of Times Discharge Criteria Were Exceeded for the St. Lucie Estuary During the 31-Year Simulation Period. ....	149
Table 27.	The Number of Times Discharge Criteria Were Exceeded for the 31-Year Simulation Period in the Incremental Simulations for the St. Lucie Estuary. ....	150
Table 28.	Number of Times Discharge Criteria Were Exceeded for the Caloosahatchee Estuary During the 31-Year Simulation Period. ....	151
Table 29.	The Number of Times Discharge Criteria Were Exceeded for the 31-Year Simulation Period in the Incremental Simulations for the Caloosahatchee Estuary. ....	152
Table 30.	Number of Times Discharge Criteria Were Exceeded for the Lake Worth Lagoon During the 31-Year Simulation. ....	153
Table 31.	The Number of Times Discharge Criteria Were Exceeded for the 31-Year Simulation Period in the Incremental Simulations for the Lake Worth Lagoon. ....	154
Table 32.	Duration of Average Annual Flooding in the Base Case and Alternative Simulations for the Everglades. ....	156
Table 33.	Number of Weeks the Low Water Depth Criterion Was Exceeded in the Base Case and Alternative Simulations for the Everglades. ....	157
Table 34.	Number of Weeks the High Water Depth Criterion Exceeded in the Base Case and Alternative Simulations for the Everglades. ....	158
Table 35.	Duration of Average Annual Flooding in the Incremental Simulations for the Everglades. ....	159
Table 36.	Number of Weeks the Low Water Depth Criterion Exceeded in the Incremental Simulations for the Everglades. ....	160

Table 37.	Number of Weeks the High Water Depth Criterion Exceeded in the Incremental Simulations for the Everglades. ....	161
Table 38.	Total Average Annual Flows Discharged into northern Everglades National Park, east and west of L-67A (1000 acre-ft).....	170
Table 39.	Mean NSM Hydroperiod Matches with Respect to NSM. ....	170
Table 40.	Minimum Water Level, Duration, and Return Frequency Performance Measures for Selected Water Management Gages Located within the Everglades (SFWMD, 2000e).....	172
Table 41.	Minimum Flows and Levels Results in the Base Case and Alternative Simulations for the Everglades. ....	173
Table 42.	Minimum Flows and Levels Results of the 2005 Incremental Simulation and the 2005 SSM Scenario for the Everglades. ....	175
Table 43.	Total Mean Annual Flows Discharged into Northern, Central, and Southern Biscayne Bay for the Base Case and Alternatives during the 31-Year Simulation Period. ....	177
Table 44.	Total Mean Annual Flows Discharged into Northern, Central, and Southern Biscayne Bay for the Incremental Simulations during the 31-Year Simulation Period. ....	177
Table 45.	The number of Times Minimal Minimum Flows and Levels Operational Criteria was not Met for the Biscayne Aquifer. ....	178
Table 46.	Water Resource Development Projects that Provide Water Supplies Associated with MFL Recovery Plan and Water Reservations ....	192
Table 47.	Summary Information Regarding Water Resource Development Recommendations from the Interim Plan. ....	200
Table 48.	Minimum and Maximum Water Delivered to Major Features within the Lower East Coast Planning Area ....	214
Table 49.	Average Annual Amounts of Water Provided (1,000 ac. ft.) by Lower East Coast Water Supply Plan Components. ....	215
Table 50.	Average Annual Basin by Basin Demands for the 31 Year Simulation Period and for Drought Years and How They Are Met. ....	216
Table 51.	Summary of LEC Water Utility Pumps On/Pumps Off Scenario for Selected Everglades Sites for the 2020 Base Case. ....	227
Table 52.	Model Simulation for Selected Everglades Sites: 2005 versus 2005 with a 30 Percent Cutback in Public Water Supply Withdrawals for Miami-Dade County.....	228
Table 53.	Model Simulation for Selected Everglades Sites: 2005 versus 2005 with a 30 Percent Cutback in Public Water Supply Withdrawals for Miami-Dade County. ....	229
Table 54.	Changes in Per Capita Water Use for Larger Utilities in the District.....	240

Table 55.	1998 Mobile Irrigation Lab Costs and Estimated Water Savings. ....	241
Table 56.	Representative Water Use and Cost Analysis for Retrofit Indoor Water Conservation Measures. ....	242
Table 57.	Representative Water Use and Cost Analysis for Retrofit Outdoor Water Conservation Measures. ....	242
Table 58.	Irrigation Costs and Water Use Savings Associated with Conversion from Flood Irrigation to Microirrigation. ....	243
Table 59.	Average Per Capita Water Use Resulting From Projections A and B. ....	244
Table 60.	Reduction in Total Average Use Resulting from Conservation. ....	245
Table 61.	Surficial Aquifer System Well Costs. ....	246
Table 62.	Lime Softening Treatment Costs. ....	247
Table 63.	Membrane Softening Costs. ....	247
Table 64.	Floridan Aquifer System Well Costs. ....	251
Table 65.	Reverse Osmosis Treatment Costs. ....	251
Table 66.	Concentrate Disposal Costs. ....	252
Table 67.	Domestic Wastewater Treatment Facilities Providing Reuse. ....	255
Table 68.	Reclaimed Water Utilization. ....	256
Table 69.	Disposal Facilities with No Reuse. ....	258
Table 70.	Aquifer Storage and Recovery System Costs. ....	261
Table 71.	Reservoir Costs. ....	263
Table 72.	Estimated Schedule and Costs for Regional Saltwater Intrusion Management for the Biscayne Aquifer. ....	272
Table 73.	Estimated Schedule and Costs for Refining the Floridan Aquifer System Model. ....	273
Table 74.	Estimated Schedule and Costs for Completing the Northern Palm Beach County Comprehensive Water Management Plan. ....	275
Table 75.	Estimated Schedule and Costs for Continuing the Implementation of the Palm Beach County Hillsboro Regional ASR Pilot Project. ....	276
Table 76.	Estimated Schedule and Costs for the Hillsboro (Site 1) Reservoir Pilot Project. ....	277
Table 77.	Estimated Schedule and Cost for Developing the Lake Worth Lagoon Minimum and Maximum Flow Targets. ....	278
Table 78.	Estimated Schedule and Costs for the North Broward County Secondary Canals Recharge Network. ....	280
Table 79.	Estimated Schedule and Costs for the Southeast Broward County Interconnected Water Supply System. ....	281

Table 80.	Estimated Schedule and Costs for Broward County Urban Environmental Enhancement.	282
Table 81.	Estimated Schedule and Costs for Developing the Miami-Dade WASD Utility ASR.	282
Table 82.	Estimated Schedule and Costs for Developing Biscayne Bay Minimum and Maximum Flow Targets.....	284
Table 83.	Local Sponsor Funding of Other Federal Projects by Fiscal Year. ....	285
Table 84.	Estimated Schedule and Costs for the CWMP Well Abandonment Program.....	286
Table 85.	Estimated Schedule and Costs for the CWMP Saltwater Influence Analysis. ....	287
Table 86.	Estimated Schedule and Costs for Permitting Issues Associated with ASRs. ....	287
Table 87.	Estimated Schedule and Costs for Establishing Mobile Irrigation Labs. ....	288
Table 88.	Nonfederal Funding Responsibility of CERP Projects in the Lower East Coast Planning Area. ....	289
Table 89.	Nonfederal Funding Responsibility of CERP Projects in the Caloosahatchee Water Management Planning Area.....	292
Table 90.	Estimated Schedule and Costs for the Implementation of the Caloosahatchee River ASR Pilot Project.....	301
Table 91.	Estimated Schedule and Costs for the C-43 Storage Project. ....	301
Table 92.	Estimated Schedule and Costs for the Southwest Florida Study.....	303
Table 93.	Estimated Schedule and Costs for Reservation of Water. ....	309
Table 94.	Estimated Schedule and Costs for Minimum Flows and Levels .....	310
Table 95.	Estimated Schedule and Cost for MFL Research for the Rockland Marsh .....	311
Table 96.	Estimated Schedule and Cost for MFLs for Florida Bay.....	312
Table 97.	Estimated Schedule and Costs for the Conservation Program. ....	315
Table 98.	Estimated Schedule and Costs for a Feasibility Study for Reverse Osmosis Treatment of Seawater. ....	316
Table 99.	Estimated Schedule and Costs for a Feasibility Study for a Reclaimed Water System for Northern Palm Beach County.....	318
Table 100.	Estimated Schedule and Costs for the Aquifer Recharge Study.....	319
Table 101.	Estimated Schedule and Costs for High Volume Surface Water ASR Testing/ Taylor Creek. ....	320
Table 102.	Costs of LEC Interim Plan Recommendations by Year (\$000s) .....	325
Table 103.	Cost of Other Federal, State, or District WRDPs by Year (\$000s) .....	325

Table 104. Cost of CERP (Non Federal share) WRDPs by Year (\$000s).....	325
Table 105. Cost of Operational WRDPs by Year (\$000s).....	326
Table 106. Costs of CUP and Resource Protection WRDPs by Year (\$000s) .....	326
Table 107. Costs of Other WRDPs by Year (\$000s) .....	326
